On pulmonary Consumption.

A in treating upon Letic fever might be  
useful. - ~~A gentleman~~ who has ~~now~~  
~~informed~~ me that a ~~gentleman~~ I hinted  
at the use of strong emetics for the  
purpose of abstracting this insulated  
fever from the ~~low~~ blood & repels to  
the stomach & bowels. A gentleman  
who now has me informed me that  
a Quack in Virginia has used them  
for this purpose with success in  
the pulmonary consumption. -

~~42~~

13  
 44  
 III In the typhus state <sup>of</sup> pulm<sup>2</sup> consumption:  
 the Remedies should be <sup>1</sup> Stimulants. These  
 should be medicines - Diet & Drinks.  
 of the medicines Opium sh<sup>d</sup>. be preferred  
 to all others. An accident suggested the  
 efficacy of this medicine to me in this  
 Disease. I once directed one of my pupils  
 to put up two opening pills for a patient  
<sup>apparently</sup> in the last ~~stage~~ <sup>stage</sup> of pulm<sup>2</sup>  
 typhus state <sup>consumption</sup>. He mistook the prescrip-  
 tion & gave him two Opium pills  
 of 2 grains each. He ~~kept till 12 o'clock~~  
 took them at bedtime & slept till 12 o'clock  
 next day. He awoke invigorated &  
 without much cough or any pain.  
 He begged for a repetition of his  
 medicine, to which I cheerfully

consented. By the use of it in large  
Doses at night & smaller Doses during  
the day, he was ~~perfectly~~ cured, &  
lived 18 years afterwards. I have used  
the same medicine alone in another  
case with equal success. The safety  
& advantage of this remedy is suggested  
not only by all that was said formerly  
in favor of ~~seeing~~ preventing the ex-  
penditure of sensorial power by looking  
up the muscles & nerves, but by the  
total suspension of Cough & all other  
morbid symptoms by madness. I have  
seen several instances of it, & had it oc-  
-curred earlier it would probably have  
in every ~~the~~ instance cured the  
Disease. Why should not Art imitate  
& improve upon Nature in translating

Various other stimulating & tonic medicines  
have been given in this state of consump-  
-tion with success. <sup>a mixture of</sup> Myrror ℥i Sal. tartar ℥ss  
Spirit of any kind ℥ij intimately rubbed  
together, mixed <sup>in</sup> Water ℥ijss Sal. tart  
9<sup>th</sup> & 14<sup>th</sup> ℥ij ~~each of both~~ <sup>of which</sup>  
is to be taken 3 times a day has been  
strongly recommended by Dr Mos. Griffith.  
Dr Mosely recommends in high terms a  
solution of Akers and white vitrol as  
a tonic in this <sup>public state of the</sup> disease. Three eggs put  
into a pint of Vinegar till their shells are  
dissolved, then intimately beaten together w:  
loaf sugar, and taken a glass full at a  
time, three times a day forms both a pro-  
-per cordial and a useful aliment in the  
Tubercular state of Consumption. To these remedies

this disease, <sup>44</sup>  
 it to the brain, & especially by so  
 safe a medicine as Opium? For  
 great again, we are too tender of the  
 brain in the translations of disease.  
~~Drunkards~~ Drunkards if ~~attacked~~ to teach  
 us by their weekly or daily attacks  
 of voluntary coma how much is  
 capable of bearing without perma-  
 nent injury.

V I have ~~given~~ <sup>has been added</sup> Bark in ~~this~~ <sup>as a tonic</sup> ~~state of fever~~, but I cannot say much  
 in its favor. It has <sup>done</sup> good in the form  
 of Thurnham's tincture. The remedy  
 here perhaps is the spirit with which  
 this tincture is made. I have found

~~The diet should be of the most cordial~~  
 kind much benefit for the use of  
 garlic and Tar. Three cloves of the

<sup>Smoking or chewing</sup>  
✓ Even Tobacco may be indulged in  
in this <sup>"</sup>state of Indur<sup>"</sup>: Consumption,  
provided the saliva be swallowed. Dr  
Bisect relates the case of a certain  
Mary Wood who was consumptive  
from 15 years of age who was kept  
alive till she was 96 by chewing to-  
bacco & swallowing her saliva. -

~~A diet of sweet grapes has cured this  
Disease according to Dr. Morry. I have succeeded  
in one case by prescribing this remedy.  
Krisp Ustick. Large draughts of the juice of  
the Sugar maple, and a diet of sweet apples  
have likewise cured it. Dr. Baynard says he  
once knew a broken winded horse cured by  
being turned into an orchard, and feeding  
wholly upon apples. All these articles of  
diet cured ~~only~~ by filling the blood vessels &  
thus acted like the critical diet I have recommended.~~

former first course should be taken  
 or a wine glass of an infusion of a pint of pepper  
 daily. The ~~latter~~ <sup>latter</sup> may be taken in  
 mint tea poured upon top on to the buried clove.  
 Pills 10 grains three times a day, or  
 in molasses, or  
 in a tincture, or in water. ✓

The diet should be of the most cordial  
 kind. Animal food cooked in the most  
 savoury way should be taken four or  
 five times a day. It acts by filling the  
 blood vessels, and thus adding the natural  
 & healthy stimulus of blood to our other  
 remedies. Milk may be taken if agreeable for  
 the same purpose. ✓

The drinks should be wine - brandy -  
 spirits in the form of Grog or toddy -  
 milk punch - and porter according to  
 the habits & inclinations of your patients.

To be effectual ~~these~~ all the  
 medicines, diet & drinks should be com-  
 -bined. By means of them I have  
 made several cures. <sup>Five</sup> ~~that~~ of them

V  
mercury

It was given in each of these cases, but  
It gently touched the mouth, and was  
of little use. But in the typhus state  
of this disease ~~it~~ the mercury can  
seldom be made to affect the mouth,  
and where it does not I think it does  
harm by increasing debility.

— Parker 46 Stewart & Crawford ~~the~~  
 viz: Eliza Davis, ~~the~~ In ~~the~~ ~~response~~ ~~was~~  
~~and~~ in the Penn. Hospital. ~~was~~  
~~of the~~ ~~lowest~~ ~~state~~ ~~of~~ ~~this~~ ~~disease~~  
 of ~~tense~~ ~~and~~ I cured an Englishman  
 in the summer of 1808 by giving him  
 a bottle or two of porter daily with the  
 opium, and ~~that~~ ~~that~~ ~~has~~ ~~been~~ ~~men-~~  
 cordial diet ~~that~~ ~~that~~ ~~has~~ ~~been~~ ~~men-~~  
~~tioned, of the lowest state of this disease, and~~  
~~the use of these remedies, take~~

In the use of these remedies, take  
 care not to give them prematurely, that  
 is never, before the pulse is reduced to  
 the typhus state. You may always  
 know when they are proper by their  
 rendering the pulse fuller & slower agree-  
 -ably to the rule delivered in our  
 Therapeutics.

We now & then hear of patients  
 recovering from consumptions after  
 they have dismissed their physicians &  
 left off taking medicines. ~~The~~

*[Faint, illegible handwriting, likely bleed-through from the reverse side of the page. The text appears to be a continuous paragraph.]*

of this is probably, they are in that  
~~state~~ In this state of despair they fly  
 to their <sup>former & healthy</sup> habits of living and are thus  
 cured. It is probable they owe their reco-  
 -very wholly to their not ~~being~~ retreating  
 to cordial diet & drinks until their dis-  
 -ease had descended to the <sup>lowest grade of the</sup> typhus state.

With the stimulating Remedies should be  
 used ~~the~~ Frictions. They have been useful in  
 many cases. They act by exciting the skin,  
 and thus upon the morbid excitement of  
 the lungs. Recollect what was said formerly  
 of the inverse sympathy between the  
 lungs & the skin. By exciting the one  
 we reduce the excitement of the other. It  
 is by exciting the skin by warmth, that  
 we lessen a cough, and it is by the  
 debility induced upon the skin by

✓ Channing perhaps would be  
more useful than friction in  
this state of pulmonary consumption.

exposing it to the Cold, that a Cough is  
 increased. The frictions should be used  
 to every part of the body, but chiefly to  
 the legs and Arms. Mr. White says  
 the Consumption is cured in horses by  
 frictions to their legs. <sup>prolapse</sup> ~~Drop~~ liniment  
 and the Vapor of the Stimulating Quina  
 will render the frictions more powerful  
 if applied to the flesh bare or the flax.  
 not used for that purpose. The reason  
 given for the efficacy of frictions in this  
 State of Consumption shows the great  
 importance of warm Douching as a  
 remedy for it. It should always be  
 one or two degrees greater than is  
 common, or even agreeable to the  
 patient.

2  
V them, or in but one of them, taking  
care to mention the precise <sup>or state</sup> ~~state~~ in which  
they should be employed.

W particularly the necessity of its  
being <sup>different from, or</sup> ~~opposed~~ to the former habits of  
exercise ~~of~~ or labor of our patients.  
To be effectual it should be constant.  
Persons in the evening of life require  
more exercise to cure them than younger  
persons according to Sydenham, & for an  
obvious reason. Riding on horseback  
shd be preferred to all other modes of ex-  
ercise. Next - in a ~~hurry~~ That

I shall now make a few remarks upon  
~~patients~~ certain Remedies that are proper in  
 all the States of Consumption, or in part of V.  
I Exercise when practicable is a most  
 powerful remedy in ~~this state of the~~  
 disease under consideration. It should  
 be passive in ~~the~~ <sup>its</sup> inflam<sup>d</sup> & exstensive  
 state, ~~of~~ but acts ~~as~~ <sup>as</sup> an active  
 in the typhus state ~~according to the~~  
 strength of the patient from the cooking  
 cradle, - or Chamber horse, - or Swing, up  
 to riding on horseback. Recollect the  
 rules for using this remedy delivered in  
 our Therapeutics. <sup>v</sup> - It is common  
 & highly proper to forbid travelling to the  
 Sea Shore in the inflam<sup>d</sup> & hectic states  
 of this disease. were patients able to be  
 removed to the Sea Shore in the typhus

Kind of exercise is most useful in w.<sup>ch</sup>  
the Arms are employed as suspending  
the body by them, - rowing, pulling, shunt  
cock, and jumping the rope. - The exercise  
of the lower limbs is calculated to abstract ex-  
citement from the breast. A journey on foot  
has been useful in it. I believe it would do more  
good in many cases, than any other mode of exercise.  
V powerful than exercise when it averts

can submit to it. The hardships of a  
Camp, a naval, and an agricultural  
life when increased ~~and~~ from necessity have  
all cured Consumption. They may all be  
considered as different forms of labor.

state it is probable ~~the~~ Sea Air  
 would be less hurtful. The lungs  
 & system now require stimulants,  
 & the Sea Air belongs to this class of  
 medicines. — With exercise the benefits of  
 labor sh<sup>d</sup> not be ~~was~~ forgotten. It is more  
 a change of climate. This should be neither  
 to a hot, nor a cold one, but ~~it~~ <sup>to</sup> a  
 climate where the temperature is uniform,  
 and where the glass seldom descends below  
 60°. <sup>Portugal &</sup> ~~Batavia~~ have generally been preferred  
 for this purpose. — This uniformity of  
 weather may be obtained in the United  
 States by flying from the winters of the  
 Northern & Middle States, & the Summers  
 of the Southern States. The Springs of the  
~~South~~ Georgia - South & North Carolina,  
 the Summers of Massachusetts or Vermont,  
 & the Autumns of Pennsylvania ~~afford~~

7.2  
V A ~~Dr Harrison~~ has lately mentioned  
formerly that <sup>Catastrophes</sup> ~~Consumptions~~ were  
uncommon in the Damp Atmosphere  
of Holland. Dr Harrison says <sup>Consumptions</sup> they  
are hardly known in the fens and  
marshes of Lincolnshire in England, &  
that they are relieved by persons coming  
into that ~~corrupt~~ <sup>unwholesome</sup>  
atmosphere provided they get a bilious  
erritting fever. The way ~~to~~ <sup>to</sup> ~~general~~  
<sup>of new determinations of the blood</sup>  
action in the blood vessels, ~~and the~~ <sup>the</sup> ~~in~~  
~~the~~ <sup>the</sup> ~~directs~~ <sup>the</sup> ~~lungs~~ <sup>by</sup> ~~diverting~~ <sup>diverting</sup> ~~the~~ <sup>the</sup> ~~blood~~  
<sup>to the liver & bowels.</sup>  
I would ~~advise~~ <sup>advise</sup> ~~you~~ <sup>you</sup> ~~to~~ <sup>to</sup> ~~send~~ <sup>infest</sup> ~~consumptive~~ <sup>consumptive</sup> ~~patients~~  
~~to~~ <sup>with</sup> ~~a~~ <sup>a</sup> ~~bilious~~ <sup>bilious</sup> ~~fever~~ <sup>fever</sup>, but the fact  
may lead to something new in the treatment  
of this disease. Recollect the case of

~~the best~~ will be excellent substitutes for  
the uniform climates of Portugal or  
Barbados. The benefit of travelling will  
thus be added to the benefit of a change  
of climate. But where ~~neither~~ a  
change of climate, nor travelling are  
attainable Hybernation should be  
substituted in this room. I have once  
cured a patient by this remedy, & several  
times protracted life by it. The heat of  
the room in which our patient  
is confined should be regulated by the  
state or grade of his disease. He should  
not leave his room during the ~~best~~ <sup>contingent</sup>  
=ages of cold weather, ~~or if he do, it should~~  
be only into a bedroom heated by a stove.  
I shall now make a few remarks upon  
several Remedies which have been used  
in all the states of this disease.  
p 21, on Issues. ‡

plethora Hemorrhysis in the infirm of Edin<sup>2</sup>  
caused by a general fever, or a diffusion  
of great pulmonary action thro' the whole  
Aortic System. <sup>Let it not be supposed what I said</sup>  
~~intermittents~~ <sup>that</sup> formerly ~~that~~  
countries which produce  
Intermittents, dispose to Consumptions &  
This I ~~know~~ may be true, ~~but~~ from  
the peculiarity of their action upon the  
blood vessels not being sufficient to ab-  
=tract or diffuse the pulmon<sup>ary</sup> action, but  
this is not the case in a <sup>bilious</sup> remitting fever,  
The action here is more powerful &  
more constant. I have more than  
once seen Consump<sup>tion</sup> suspended by it,  
without attending to the cause of it.

Dabivert Feb. 4. 1811.

~~†) Laertes commends them in the Arm  
pits, and weps for the shoulders. He  
advises canstics instead of issues. I have  
found a prep. blister to the left arm to be  
more useful & less offensive than issues.~~

Thus far gentlemen have I reasoned  
 from a single fact mentioned by Dr  
 Harrison, but since I delivered that  
 fact, ~~there is this history of bilious fevers~~  
~~is preventing and curing consumption,~~  
~~and of marasmodinosis in curing~~  
 those I have seen a private letter from  
 a patient of Dr Saunders of London who  
 was cured of a pulmonary consumption  
 by residing a few months at Oxford  
 place remarkable for being surrounded  
 with low marshy grounds. He mentions  
 another case equally <sup>advanced</sup> ~~bleeding~~ & dangerous  
 with his own cured by the same remedy.  
 The remedy tho' a new one, agrees with  
 all others, for they produce their effects

by exciting <sup>51.3</sup> new, and <sup>21.5</sup> opposite Actions  
in the Solids, and Determinations in the  
fluids of the body. — It seems the

Action of the miasmata not only cures  
Consumptions but prevents them, for  
the writer of the letter I have mentioned,  
<sup>whom to p 51</sup>

says, they are ~~not~~ known at present;  
<sup>naturally</sup>

Dr Drake in his ingenious history of  
<sup>the settlement at</sup>  
~~the miasmata~~ <sup>the</sup> Cincinnati tells us

that not more than  $\frac{1}{10}$  of the Deaths  
in that place are from Consumption.  
~~any way~~ He tells us at the same  
time, that bilious fevers prevail there.

may not the miasmata which pro-  
duce those fevers be the cause of the  
small number of Deaths from pul-  
monary Consumption? —

3 A milk diet. much good, and much harm have been done by this remedy in pulmonary Consumption. In the Synocha & Synochula State of this disease it should be strictly forbidden from its conveying too much nourishment into the body. In the typhus State of Consumption it should be recommended in order to fill the blood vessels, and thereby to assist cordial diet & remedies in giving tone to the system. But in all cases of Consumption <sup>induced by</sup> ~~is~~ <sup>induced by</sup> an acid humor falling upon the lungs, or where the system suffers from the secretion of acid matter by the lungs, a milk diet will be proper. The transfusion of the blood of lambs & calves was once attempted into the veins of diseased & old persons. A change

53  
in the blood may be made by with-  
-~~ten~~ taken exclusively that shall impart to  
it, the same mild qualities that have been  
observed in the blood of the young animals  
that have been mentioned. The milk may  
be taken alone - Skimmed - Diluted with  
water, or a part of its component parts  
viz Whey or Buttermilk according to cir-  
-cumstances. ~~Into~~ Where an acid exists  
in the Stomach it should be taken with  
its oil or Cream. Whey <sup>should</sup> ~~will~~ be preferred  
where it is proper to give it in the in-  
-flam<sup>y</sup> state of the disease. a little salted meat  
or salted fish should be taken with it when  
it disorders the Stomach. Sometimes it is  
ruined and digested with most ease by the  
Stomach when a little loaf sugar, or  
brandy is added to it.

4 A Diet of Sweet Substances. Ripe grapes  
 Dr Moore says cured the Consumption in  
 France. I think I cured the daughter of the  
 late Rev<sup>d</sup> Mr. Motich by prescribing a diet of  
 Malaga grapes for her in the lowest state of  
 this disease. Large draughts of the juice of  
 the Sugar maple tree and a Diet of Sweet Ap-  
 -ples, alone have cured it in two in-  
 -stances in a frontier County in Pennsylvania.  
 A Diet consisting exclusively of bread & butter  
 spread over with Sugar have cured two  
 Cases of it in the <sup>Dr Wilkins informs me</sup> neighborhood of Balti-  
 -more. Large quantities of molasses with  
 a little Spirit added to it have cured this  
 disease in one of the New England States.  
 It is probable that all our ~~warm~~ Cough  
 medicines do good in Consumptions

only in consequence of this convey<sup>ing</sup> ~~the~~ <sup>the</sup> quantity of saccharine matter in the system. ~~human~~  
 Perhaps the superior efficacy of ~~human~~ <sup>women's</sup> milk in consumption, above cows milk depends upon its containing more saccharine matter. ~~It is remarkable that~~ <sup>It is remarkable that</sup>  
 in the two cases of consumption cured by bread & butter covered with sugar, the patients became fat ~~and~~ in proportion <sup>as</sup> of the disease left them. Was the fat in this case a vicarious disease? and did it ~~can~~ create a determination from the lungs, to the surface of the body? I have heard of two horses being cured of what is called "broken wind" by being let ~~to~~ loose in an orchard and feeding for some weeks upon ripe apples. One of them became very fat. Was the cure in this case, the ~~new~~ <sup>new</sup> diet, or the

V Perhaps more benefit might be obtained  
by applying blisters to the joints. I am  
induced to suggest this idea from having  
so often observed a prelu<sup>e</sup> Consumption,  
~~was~~ cured or suspended by the Rheumatism.  
The blisters to the joints would probably act  
as substitutes for that disease.

VI It was for this reason probably  
that Zacutus advises issues to be opened  
in that part of the body. & says for com:  
= mends Caustics ~~app~~ instead of issues, &  
prefers their Application to the Shoulders.

new disease  
induced by it? 56

5 Spurs to the arms; and letons in the sides  
have been employed with success in this  
disease. They are depleting remedies, and  
therefore should be employed only in a preter-  
-naturally excited state of the system. I have  
generally preferred to them both, a perpetual  
blister to the left arm, as discharging  
more fully, and being less offensive to the  
delicacy ~~and~~ and prejudices of patients. I have lately  
heard of several cases of Consumption ter-  
-minating favourably by large Abscesses in  
the arm pits. <sup>or</sup> Could an artificial Drain be  
made from those parts by blisters or by  
any other means, it would probably be  
more useful than a single Drain by a  
small blister from the left arm.

6 Many Attempts have been made to

cure consumption by the application of cer-  
 -tain ~~and~~ substances in a gaseous form  
 to the lungs. The Smoke of Resin, and of resin  
 and wax, of tar - of the Vapor of Ether - of  
 Ardent Spirits - of <sup>mineral gas</sup> Volatile Alkali, and of  
 Air ~~one~~ with an increase, and with a dimi-  
 -nution of Oxygen, have all been em-  
 -ployed for this purpose. They all presup-  
 -pose the disease to be seated exclusively in  
 the lungs, and as they <sup>at best but feebly & transiently</sup> ~~have no action upon~~  
 the whole system either as Stimulants or  
 Sedatives, they have hitherto done but little  
 service, except now and then pacifying the  
 Cough. I said formerly that the hectic fever  
 is <sup>nature's destructive substitute for</sup> ~~the effect of the disease~~ <sup>in the</sup>  
 tubercles, or Ulcers in the lungs. were it popi-  
 -ble by long perseverance in the use of

✓ That I have seen more than  
once, a consumption cured by a piece  
- of money. Mr. Ingham's mentions of  
case of hectic fever induced by an ulcer  
in the leg being suddenly cured by am-  
-putating the limb. The remedy here  
I believe was the pain of the operati-  
-on and the subsequent inflammation  
of the wound inflicted by it.

those purifications, or by employing more  
 active ones to excite inflammation in those  
 tubercles, ~~so as to allow~~<sup>to allow</sup>, as to dispose nature  
 to discharge, or to heal them - Who knows  
 what might be <sup>this</sup> effect in curing the  
 hectic fever, and thereby of curing Consump-  
 tion? — I deliver this suggestion with  
 caution. In a disease so ~~deplorable~~<sup>enveloped in doubt</sup>, and so  
~~generally incurable~~<sup>Darkness,</sup>, the smallest ray of  
 light ~~may conduct us to open day~~<sup>should be pursued. Where death is certain,</sup>  
~~experiment~~<sup>uncertain</sup> remedies are not only in-  
 nocent, but it is criminal, not to employ  
 them. In favor of them, I shall only repeat  
 & much has been said in favor of Digitalis  
 in pulmonary Consumption. It is a powerful  
 and universal Stimulant, and acts by <sup>lifting</sup> ~~lifting~~  
 the action of the blood vessels, by the diminution  
 of their irritability. Its use should of course  
 be confined wholly to ~~the~~<sup>the</sup> inflamed state of

Consumption. In  $\mathbb{L}$  is in this state only I  
 believe it has ever performed a cure. Af-  
 -ter the formation of tubercles, Ulcers, or  
 an Abscess, it ~~may~~ has given relief,  
 but I believe never cured. When aided by  
~~more~~ efficient <sup>other</sup> remedies, it may be employed like  
 Opium as a palliative ~~remedy~~ <sup>medicine</sup>, but it should  
 never be trusted to exclusively in this disease.  
 It owes much of its credit to a belief that  
 fever consists only in a frequent pulse, &  
 that it is to be cured by reducing it to its  
 natural Standard or below it. By the habi-  
 -tual use of it, the functions of the stomach  
 are often impaired, by which means we  
 are deprived of all the benefits we expect from  
 diet, and the perfect Assimilation of it into  
 healthy Chyle and Blood. There is scarcely  
 any one advantage gained by this medicine

the

S  
L  
S  
T  
S

2 that may not be obtained by other remedies that are familiar to us, & that are perfectly safe in this operation.

& A Saviour has lately been employed in this disease and in many instances with success. I think I have seen it ~~crossed~~ <sup>succeed in all</sup> the <sup>acute state</sup> ~~these states~~ of consumption, but it ~~is~~ <sup>is</sup> ~~not~~ <sup>never</sup> ~~always~~ <sup>always</sup> cures in ~~the~~ its ~~inflammatory~~ <sup>inflammatory</sup> state, before disorganization has taken place in the lungs. It is peculiarly useful in ~~those~~ <sup>Sympathetic</sup> cases of ~~Consumption~~ <sup>Consumption</sup> from Ob-  
-structions in the liver & spleen, ~~which~~ <sup>and which</sup> frequently succeed the Autumnal fever. Of 36 <sup>who were</sup> patients who died of Consumption, opened by Dr. Proust, one half of them had enlarged spleens, ~~for which reason~~ <sup>for which reason</sup> the Saviour ~~is~~ <sup>should</sup>

<sup>be</sup> not forbidden by a spitting of blood, for this  
 I shall say hereafter is often occasioned by  
 an obstructed spleen, ~~which is~~ where a saliv-  
 -ation does not cure, it generally produces  
 the cough <sup>- fever</sup> and night sweats. It should be  
 repeated <sup>if necessary</sup> two or three times. In Virginia it  
 has lately performed <sup>a case</sup> After having been five  
 times used without effect. It is because  
 consumption has been generally supposed  
 to consist in a primary disease of the  
 lungs, that the disease has been said to  
 be cured by the suspension only of <sup>its</sup> ~~the cough~~,  
<sup>symptoms as they appear in the lungs.</sup>  
~~fever and night sweats.~~ The disease like  
 other chronic diseases consists of three parts,  
 viz: predisposing debility - inflammation, tu-  
 -bercles, ulcers or abscess in the lungs, and ~~fever~~  
 cough, fever and night sweats. The salivation
